

AI-Powered Job Recruitment & Candidate Management System

Project Overview:

The **AI-Powered Job Recruitment & Candidate Management System (AIRCMS)** is a Salesforce-based recruitment platform designed to streamline and intelligently manage the end-to-end hiring lifecycle — from candidate application and screening to offer approval and onboarding.

The system centralizes candidate records, job openings, interview processes, recruiter activities, hiring approvals, and AI-driven evaluation insights into a single intelligent workspace.

Built using Salesforce Admin capabilities, Flows, Approval Processes, Lightning Experience, and Agentforce AI, the application eliminates manual resume screening and inconsistent hiring decisions by introducing intelligent candidate scoring and automated workflows.

Recruiters can instantly view AI-generated summaries, candidate priority indicators, and hiring recommendations directly on candidate records. Hiring managers can review salary approvals, risk insights, and interview performance summaries through structured dashboards and automated alerts.

This solution enhances recruitment efficiency, ensures standardized decision-making, improves candidate quality, and enforces governance using role-based security and approval processes.

The system is scalable, secure, and designed to support high-volume recruitment operations while maintaining data integrity and transparency.

Objectives

Centralized Recruitment Management

Provide a single Salesforce platform to manage:

- Candidate profiles
- Job openings
- Applications
- Interview stages
- Offer approvals
- AI hiring recommendations

Automation of Recruitment Workflows

Streamline:

- Candidate screening
- Interview scheduling
- Offer approval workflows
- Recruiter follow-up reminders
- Status updates

AI-Driven Hiring Intelligence

Enable:

- AI candidate scoring
- Hiring risk analysis
- Candidate summaries

- Recommendation support

Security & Governance

Ensure:

- Controlled access to hiring data
- Approval enforcement
- Role-based record visibility

Phase1: Requirement Analysis and Planning

Understanding Business Requirements

Modern organizations receive hundreds of candidate applications daily. Most hiring teams rely on spreadsheets, emails, and disconnected tools, which leads to:

- Duplicate candidate records
- Lost applications
- Delayed interviews
- Inconsistent hiring decisions
- Lack of transparency
- Poor tracking of recruitment metrics

The business requires a centralized CRM-based hiring system that can:

- Track all candidates in one place
- Standardize screening
- Automate hiring workflows
- Provide AI-driven evaluation

- Improve recruiter productivity
- Support managerial approvals

Salesforce is selected because it offers:

- Secure cloud infrastructure
- Built-in automation tools
- AI capabilities through Agentforce
- Scalable architecture
- Real-time reporting

Defining Project Scope and Objectives

Project Scope

The project includes building a Salesforce recruitment system using Admin tools and Agentforce AI without custom Apex development.

The application supports the full recruitment lifecycle:

Candidate → Screening → Interview → Offer → Hiring

Objectives

- Implement Salesforce CRM fundamentals in hiring
- Create a scalable recruitment data model
- Apply security at all levels
- Automate workflows using Flows
- Use AI for candidate evaluation
- Enable approval-driven hiring decisions

Phase 2: Salesforce Development – Backend & Configuration

Milestone 1: Salesforce Account

Introduction:

Are you new to Salesforce? Not sure exactly what it is, or how to use it? Don't know where you should start on your learning journey? If you've answered yes to any of these questions, then you're in the right place. This module is for you.

Welcome to Salesforce! Salesforce is game-changing technology, with a host of productivity-boosting features, that will help you sell smarter and faster. As you work toward your badge for this module, we'll take you through these features and answer the question, "What is Salesforce, anyway?".

What Is Salesforce?

Salesforce is your customer success platform, designed to help you sell, service, market, analyze, and connect with your customers.

Activity 1: Creating Developer Account:

Creating a developer org in salesforce.

1. Go to <https://developer.salesforce.com/signup>
2. On the sign-up form, enter the following details:

fast and get hands-on with
Agentforce and Data Cloud.

Sign up for your Developer Edition.

- ✓ Build apps fast with drag-and-drop tools
- ✓ Go further with Apex code
- ✓ Build AI agents with Agentforce
- ✓ Harmonize your data with Data Cloud
- ✓ Ground Agentforce with structured and unstructured data
- ✓ Integrate with anything using APIs

Sign up for your Developer Edition

A free Salesforce Platform environment with Agentforce and Data Cloud

First name	Last name
Experiencial ✓	Learning ✓
Job title	Company
Developer ✓	Smartbridge ✓
Country/region	Work email
India ✓ ▼	mounikakatta63@gmail.... ✓

☐ I agree to the [Main Services Agreement – Developer Services](#) and [Salesforce Program Agreement](#)

Your free trial may be provisioned on or migrated to Hyperforce, Salesforce's public cloud infrastructure.

I acknowledge, as described in the Developer Documentation: (1) the Developer Edition includes autonomous and other generative AI features; and (2) Salesforce may limit use of those features and the org, and may terminate any org that has been inactive for 45 days.

We value your privacy. To learn more, visit our [Privacy Statement](#).

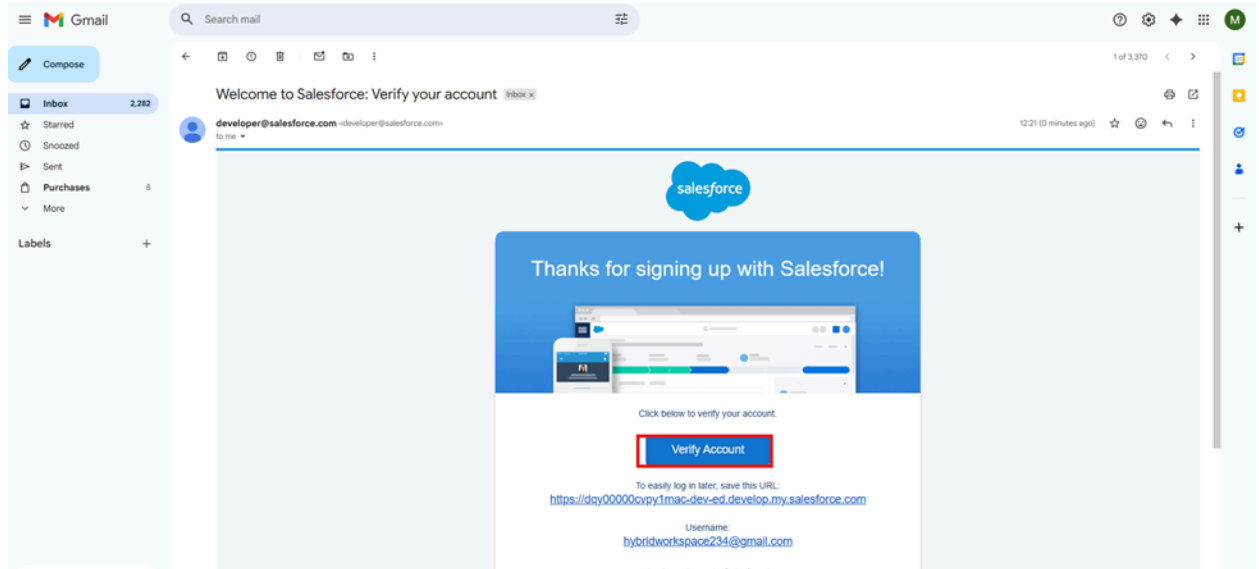

Sign me up

- 1) First name & Last name
- 2) Email
- 3) Job Title: Developer
- 4) Company: College Name
- 5) Country: India

Click on sign me up after filling these.

Activity 2: Account Activation

1. Go to the inbox of the email that you used while signing up. Click on the verify account to activate your account. The email may take 10-30mins and sometimes 2 hours.

2. Click on Verify Account
3. Give a password and answer a security question and click on change password.

4. Then you will redirect to your salesforce setup page.

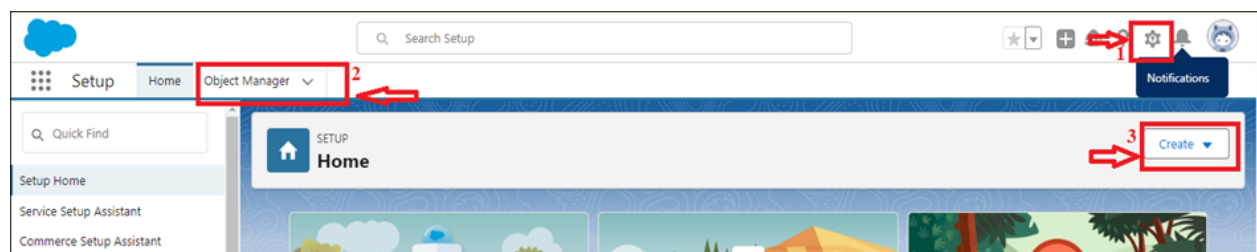

Milestone 2: Objects Creation

The recruitment system requires custom objects to represent hiring data.

Activity 1: Creating Job Opening Object

To create an object:

1. From the Setup page
2. Click on Object Manager
3. Click on Create >> Custom Object
4. Enter the Label name as Job Opening
5. Enter Plural Label name as Job Openings
6. Enter Record Name as Job Title
7. Select Data Type Text
8. Select Allow Reports
9. Select Allow Search
10. Enable Track Field History
11. Click on Save and New

Optional Features

- ☒ Allow Reports
- ☒ Allow Activities
- ☒ Track Field History
- ☐ Allow in Chatter Groups
- ☐ Enable Licensing [?](#)

Object Classification

When these settings are enabled, this object is classified as an Enterprise Application object. When these settings are disabled, this object is classified as a Light Application object. [Learn more](#)

- ☒ Allow Sharing
- ☒ Allow Bulk API Access
- ☒ Allow Streaming API Access

Deployment Status [What is this?](#)

☐ In Development

☒ Deployed

Search Status

When this setting is enabled, your users can find records of this object type when they search. [Learn more](#)

- ☒ Allow Search

Object Creation Options (Available only when custom object is first created)

- ☒ Add Notes and Attachments related list to default page layout
- ☐ Launch New Custom Tab Wizard after saving this custom object

[Save](#) [Save & New](#) [Cancel](#)

Activity 2: Creating Candidate Application Object

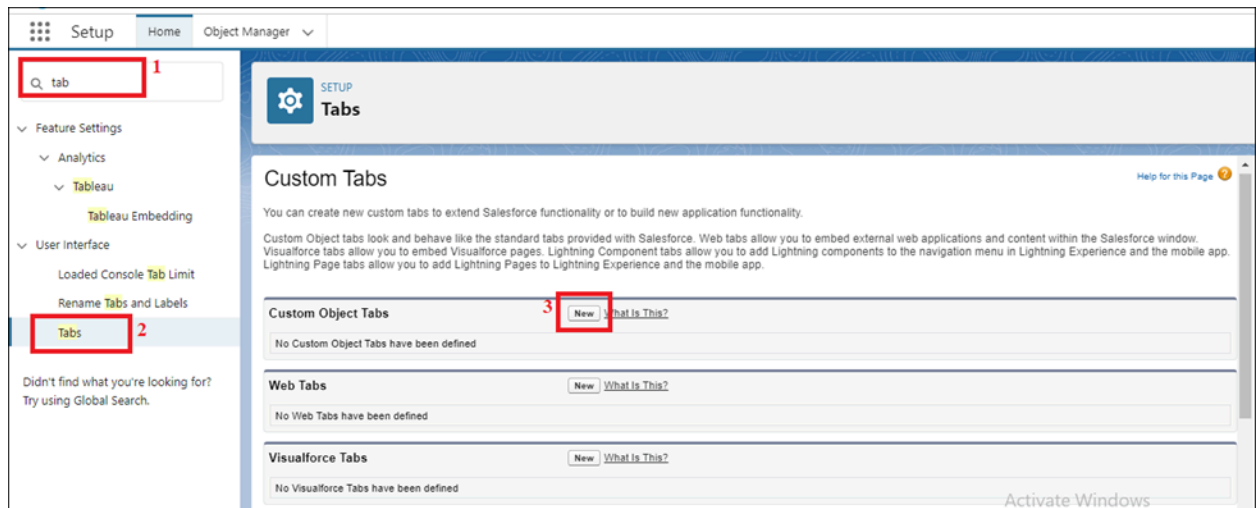

To create an object:

1. From the Setup page
 2. Click on Object Manager
 3. Click on Create >> Custom Object
 4. Enter the Label name as Candidate Application
 5. Enter Plural Label name as Candidate Applications
 6. Enter Record Name as Application ID
 7. Select Data Type as Auto Number: CA - {0000}, Starting with 1
 8. Select Allow Reports
 9. Select Allow Search
 10. Enable Track Field History
- Click on Save

Milestone 3- Tabs

Activity 1: Creating a tab for Job Opening Object

1. Go to the setup page → type Tabs in Quick Find bar
2. Click on tabs
3. Click on New (under custom object tab).
4. Select Object (Job Opening) >> Select the tab style
5. Click on Next >> (Add to profiles page) keep it as default >> Click on Next (Add to Custom App) uncheck the include tab.
6. Make sure that the Append tab to the user's existing personal customizations is checked.
7. Click save

Activity 2: Creating a tab for Candidate Application Object

1. Go to the setup page → type Tabs in Quick Find bar
2. Click on tabs
3. Click on New (under custom object tab).
4. Select Object (Candidate Application) >> Select the tab style
5. Click on Next >> (Add to profiles page) keep it as default >> Click on Next (Add to Custom App) uncheck the include tab.
6. Make sure that the Append tab to the user's existing personal customizations is checked.

7. Click save

Milestone 4: Fields & Relationships

Object	Field Name	Data Type	Required
Contact	Candidate ID	Auto Number C-{0000} Starting Number-1	Yes
	Experience Level	Picklist(Fresher, Mid-Level, Senior)	Yes
Job Opening	Department	Picklist(IT, HR, Finance, Sales)	Yes
	Salary Range	Currency	Yes

	Vacancies	Number	Yes
	Job Status	Picklist (Open, Closed, On Hold)	
Candidate Application	Candidate	Master- Detail (Contact)	Yes
	Job Opening	Master- Detail (Job Opening)	Yes
	Application Date	Date	Yes
	AI Candidate Score	Number	Yes
	Offer Amount	Currency	Yes
	Application Status	Screening Interview Offer Submitted Approved	Yes

[illegible]

--	--	--	--

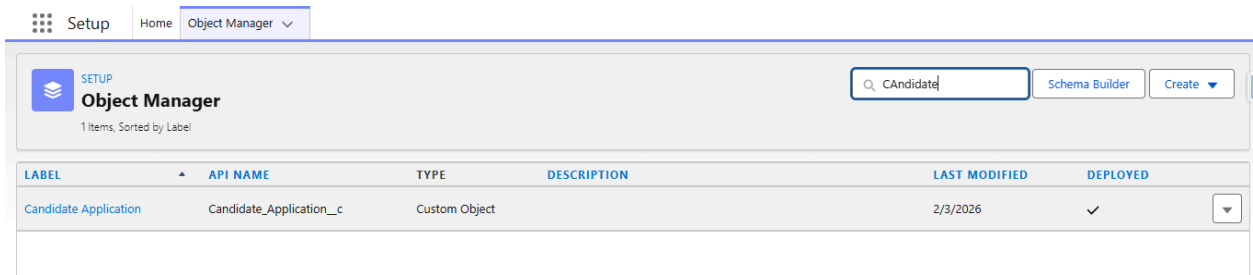

Activity 1: Creation of Picklist field for Contact object:

1. Go to Setup → Click on Object Manager
2. Type object name Contact in the Quick Find box → Click on Contact
3. Click on Fields & Relationships
4. Click on New
5. Select Data Type as Picklist and click Next
6. Enter the Field Label as Experience Level
7. Click on Enter values and enter:
 - a. Fresher
 - b. Mid- Level
 - c. Senior

Click Next, Next, and Save

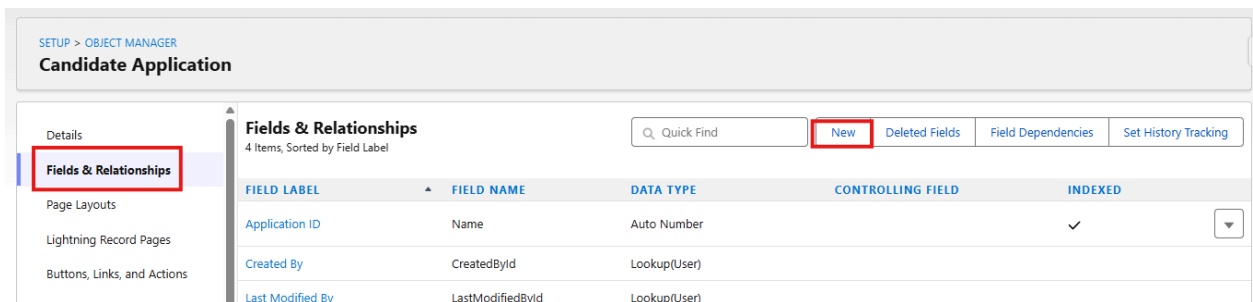

Activity 2: Creation of Master- Detail field for Candidate Application Object:

1. Go to the Setup page >> click on Object manager >> type object name (Candidate Application) in the quick find bar >> click on the Candidate Application object.

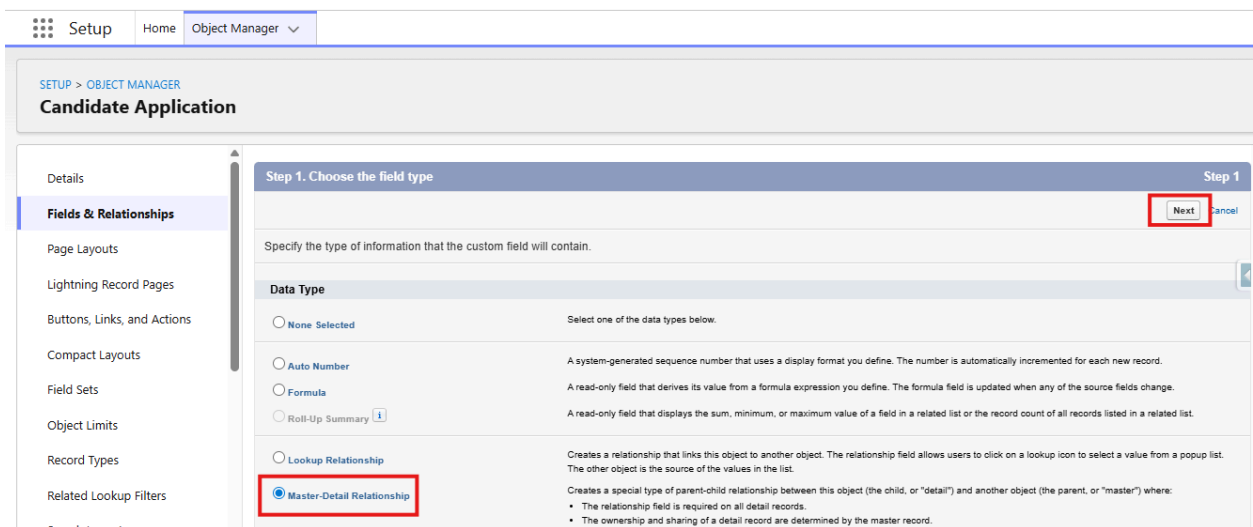

2. Click on Fields & Relationship

3. Click on New.

4. Select “Master- Detail” as data type and click Next.

5. Select the related object “Contact”.

6. Click on Next.

8. Click on Next, Next, Next, Save.

Note: Create other fields from the above Fields table related to this object and choose the data types of the fields carefully.

Milestone 5 - Validation Rules

Activity 1: To create a Validation rule to Candidate Application Object

1. Go to setup >> click on Object Manager >> type object name (Candidate Application) in search bar >> click on the Candidate Application object
2. Click on the validation rule >> click on New.
3. Enter the Rule name as “Offer Amount Validation”.
4. Select Active
5. Insert the Error Condition Formula as:

$$\text{Offer_Amount_c} \leq 0$$
6. Enter the Error Message as “Offer amount must be greater than zero.”.
7. Select the Error location as Top of the page
8. Click Save.

Activity 2: To create a Validation rule to Job OpeningObject

1. Validation Rule on Vacancies:

1. Go to setup >> click on Object Manager >> type object name (Job Opening) in search bar >> click on the Job Opening object
2. Click on the validation rule >> click on New.
3. Enter the Rule name as “Job Vacancies Validation”.
4. Select Active
5. Insert the Error Condition Formula as:

$$\text{Vacancies_c} < 0$$

6. Enter the Error Message as “Vacancies cannot be negative.”.
7. Select the Error location as Top of the page
8. Click Save.

Activity 3: To create a Validation rule on Candidate Application Object

1. Validation Rule on AI Candidate Score:

1. Go to setup >> click on Object Manager >> type object name (Candidate Application) in search bar >> click on the Candidate Application object
2. Click on the validation rule >> click on New.
3. Enter the Rule name as “AI Candidate Score Validation”.
4. Select Active
5. Insert the Error Condition Formula as:

OR(

AI__Candidate_Score__c < 0,

AI__Candidate_Score__c > 100

)
6. Enter the Error Message as “AI Candidate score cannot exceed 100.”.
7. Select the Error location as Top of the page
8. Click Save.

Milestone 6 – Duplicate and Matching Rules

This milestone ensures data integrity in the Recruitment System by preventing duplicate Candidate (Contact) records and duplicate Candidate Application records.

Accurate and clean hiring data is critical for:

Reliable AI candidate scoring

Correct risk analysis

Meaningful Agentforce recommendations

Accurate offer approvals and reporting

Activity 1: Create a Custom Matching Rule for Candidate (Contact)

Objective:

Objective: Ensure each candidate is uniquely identified using Email and Phone.

Steps:

1. Go to Setup.
2. In the Quick Find box, search for Matching Rules.
3. Click New Rule.
4. Select Object: Contact and click Next.
5. Enter Rule Name: Unique Candidate – Email & Phone.
6. In Matching Criteria:
 - Field: Email → Matching Method: Exact
 - Field: Phone → Matching Method: Exact
7. Check Match Blank Fields.
8. Click Next.

9. Click Save & Activate.

Activity 2: Create a Duplicate Rule for Candidate (Contact)

Steps:

1. Go to Setup.
2. Search for Duplicate Rules.
3. Click New Rule.
4. Select Object: Contact.
5. Enter Rule Name: Unique Candidate Email and Phone.
6. Set Action on Create and Action on Edit: Allow and Report.

In Alert Text:

Candidate Email and Phone Number must be unique.

7. In the Matching Rules section:
8. Click Add Rule.
9. Select the previously created Matching Rule
(Unique Candidate – Email & Phone).
10. Click Save & Activate.

Milestone 7: Profiles

A profile is a group/collection of settings and permissions that define what a user can do in salesforce. Profile controls “Object permissions, Field permissions, User permissions, Tab settings, App settings, Apex class access, Visualforce page access, Page layouts, Record Types, Login hours & Login IP ranges. You can define profiles by the user's job function. For example, System Administrator, Developer, Sales Representative.

Types of profiles in salesforce

1. Standard profiles:

By default, salesforce provides below standard profiles.

- Contract Manager
- Read Only
- Marketing User
- Solutions Manager
- Standard User
- System Administrator.

We cannot delete standard ones

Each of these standard ones includes a default set of permissions for all of the standard objects available on the platform.

2. Custom Profiles:

Custom ones defined by us.

They can be deleted if there are no users assigned with that particular one.

Activity 1: Recruiter Profile Creation

Objective

Provide recruiters with controlled access to candidate applications, job openings, AI hiring insights, and daily recruitment activities.

To create a new profile:

- Go to Setup >> type Profiles in Quick Find box >> click Profiles >> clone the desired profile (Standard User) >> enter profile name: Recruiter Profile >> Save.
- While still on the profile page, click Edit.
- Select the Custom App settings as default for the AI-Powered Recruitment & Candidate Management System
- Scroll down to **Custom Object Permissions** and give **Read/Create/Edit** access for the following objects:
 - Contact (Candidate)
 - Candidate_Application__c
 - Job_Opening__c

Grant Read-Only access for:

- Reports
- Dashboards
- Set Session Timeout to 2 hours of inactivity.

AI & Agentforce Access:

- Read access to AI-related fields:
 - AI Candidate Score
- No approval or override permissions
- Configure Password Policies as:

- Passwords expire in 90 days
- Minimum password length = 8
- Click Save

Activity 2: Hiring Manager Profile Creation

1. Go to setup >> type profiles in quick find box >> click on profiles >> clone the desired profile (Standard User Profile) >> enter profile name (Hiring Manager Profile) >> Save.
2. While still on the profile page, click **Edit**.
3. Select the Custom App as default:

AI-Powered Recruitment & Candidate Management System

4. Grant **Read/Create/Edit/Delete** access for:
 - Contact (Candidate)
 - Candidate_Application__c
 - Job_Opening__c
 - Reports
 - Dashboards
5. Approval Permissions:
 - Can approve/reject high salary offers
 - Can override AI recommendations
6. AI & Agentforce Access:
 - Full visibility of AI candidate score
 - Risk analysis
 - Hiring recommendations

7. Set Session Timeout: 2 hours
8. Click **Save**

Milestone 8: Roles & Role Hierarchy

A role in Salesforce defines a user's record-level data visibility.

Roles control who can see whose records in the organization hierarchy.

In the **AI-Powered Job Recruitment & Candidate Management System**, roles are used to ensure:

Recruiters see only their assigned candidates and applications

Hiring managers can see all team recruitment records

Secure and structured access to candidate and hiring data

Activity 1: Creation of Hiring Manager Role

Creating Hiring Manager Role:

1. Go to Quick Find
 - Search for Roles
 - Click on Set Up Roles.
2. Click Expand All and click Add Role under CEO.
3. Enter:
 - Label: Hiring Manager
 - Role Name: Auto populated
4. Click Save.

Activity 2: Creation of Recruiter Role

Creating Recruiter role under Hiring Manager role:

1. Go to Quick Find
 - Search for Roles
 - Click on Set Up Roles.
2. Click the + (Add Role) under Hiring Manager.
3. Enter:
 - Label: Recruiter
 - Role Name: Auto populated
4. Click Save.

Milestone 9:Users

A user is anyone who logs in to Salesforce. Users represent people involved in the **AI-Powered Job Recruitment & Candidate Management System**, such as recruiters, hiring managers, and administrators, who need access to candidate applications, job openings, and approval processes.

Each user in Salesforce has a user account.

The user account identifies the user, and the user account settings determine what features, objects, and records the user can access based on their role and profile.

Activity 1: Create Recruiter User

Note: Before Implementing Users first complete Profiles and Roles Milestones.

1. Go to Setup → type Users in the Quick Find box → select Users → click New User.

2. Fill in the following fields:

1. **First Name** : Recruiter
2. **Last Name** : User
3. **Alias** : Give an Alias Name (ex: recru)
4. **Email Id** : Give your personal Email Id
5. **Username** : Username should be in the format text@text.text and must be unique
6. **Nick Name** : Give a Nickname
7. **Role** : Recruiter
8. **User License** : Salesforce
9. **Profile** : Recruiter Profile

3. Click Save.

Activity 2: creating Hiring Manager user

1. Repeat the steps and create other users using

- a. Role : Hiring Manager
- b. User license : Salesforce
- c. Profile : Hiring Manager Profile

Activity 3: Assign Manager to Recruiter User

1. Go to Setup.
2. Search Users.
3. Open Recruiter User.
4. Click Edit.
5. In the Manager field select Hiring Manager User.
6. Click Save.

Milestone 10: APPROVAL PROCESS

Activity 1: Create an Approval Process for High Salary Candidate Offer

Note:

Before implementing the Approval Process, ensure that the following milestones are completed:

- Profiles creation (Recruiter, Hiring Manager, Admin)
- Roles hierarchy setup
- Users creation and role assignment

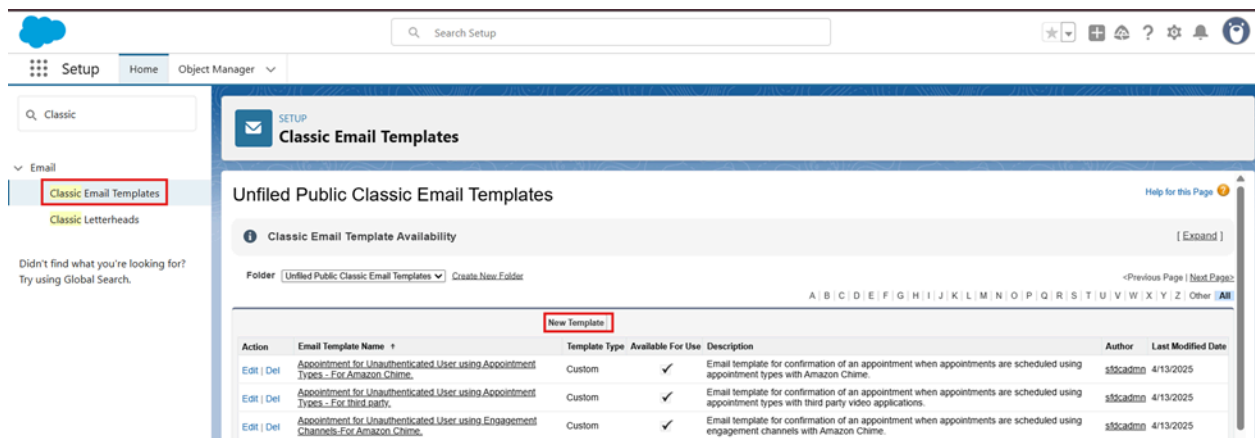

This approval process ensures that candidate job offers with high salary amounts are reviewed and approved by a Hiring Manager, preventing unauthorized compensation decisions and enforcing company hiring policies.

1. Create Classic Email Template

This email template will notify the Hiring Manager when a high salary candidate offer is submitted for approval.

Steps to Create Email Template

- Go to Setup (gear icon on top-right)
- In the Quick Find box, type Email Templates
- Click on Classic Email Templates
- Click New Template

- You'll now choose the type of email template you want to create.

Choose the type:

- Text – Plain text (no formatting)
- Click Next

Email Template Information:

Folder	Public or private folder (use "Unfiled Public Email Templates" for now)
Email Template Name	High Salary Candidate Offer Approval Notification
Template Unique Name	Auto-filled, or change it (no spaces)
Encoding	Leave default (UTF-8)
Subject	Candidate Offer Awaiting Salary Approval

Email Body

Dear

{!Candidate_Application__c.OwnerFullName
},

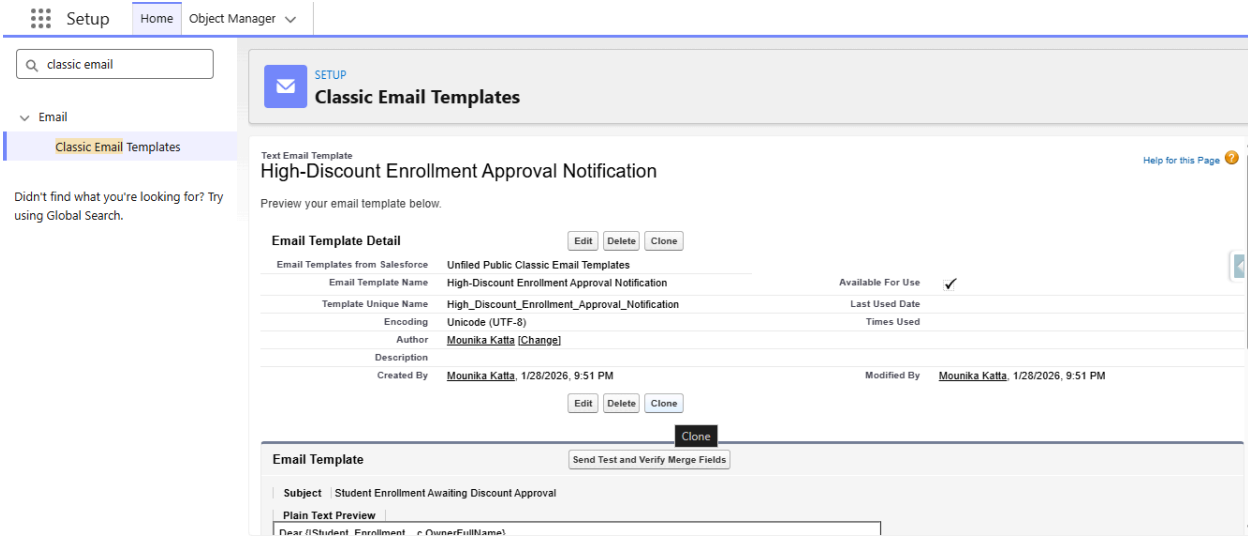

A candidate job offer with a high salary has
been submitted for your approval.

Please review the candidate application
details below:

Candidate Offer Details:

- Candidate Name:
{!Candidate_Application__c.Candidate__r.Name}
- Job Opening:
{!Candidate_Application__c.Job_Opening__r.Name}
- Experience Level:
{!Candidate_Application__c.Candidate__r.Experience_Level__c}
- Proposed Offer Amount:
{!Candidate_Application__c.Offer_Amount__c}

	● AI Candidate Score: {!Candidate_Application__c.AI_Candidate_Score__c} ● Application Status: {!Candidate_Application__c.Application_Status__c} Please take the necessary action at your earliest convenience. Thank you, AI Recruitment Management System
--	---

2. Create the Approval Process

- In the Quick Find box, type: Approval Processes
- Click on "Approval Processes" under Process Automation

- Click on the object name: Candidate Application
- Click Create New Approval Process → Use Standard Setup Wizard

Step 1: Basic Settings

- Name: High Salary Candidate Offer Approval
- Unique Name: Auto-fills (you can keep it as is)
- Click Next

 **SETUP**

- Click on Save

Milestone 13: Declarative Automation (Flows)

Activity 1: Record-Triggered Flow – High Priority Candidate Application Notification

Objective:

Automatically notify the Recruiter (Application Owner) when a candidate application is identified as high priority by AI.

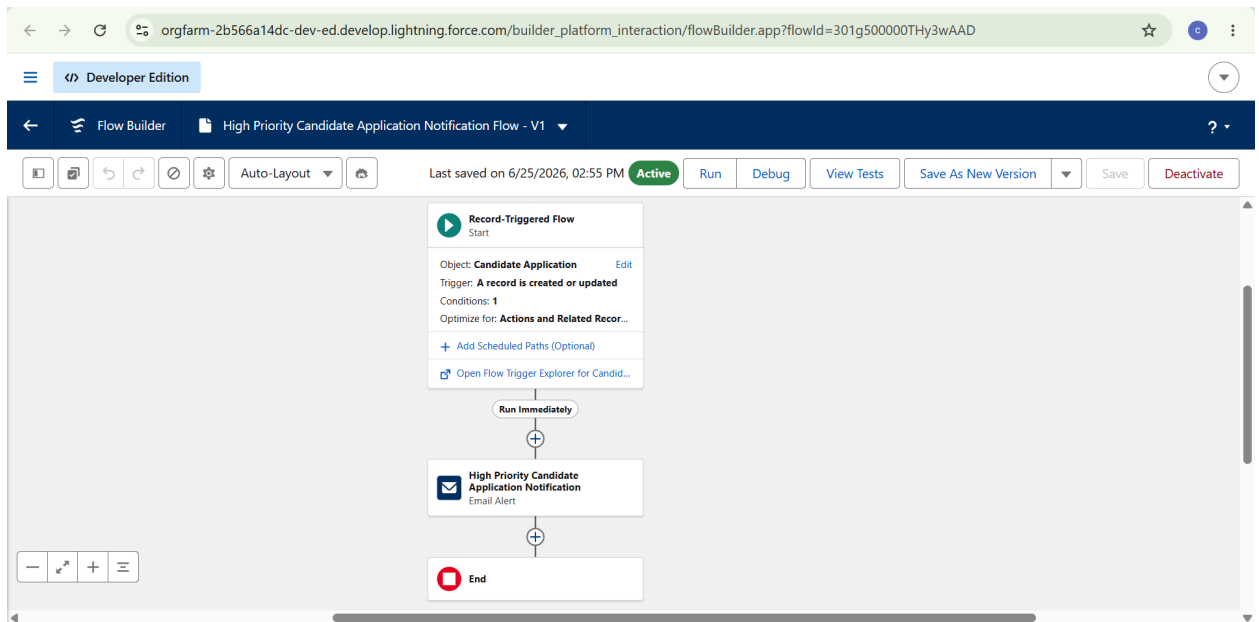

Trigger Condition:

- $AI_Candidate_Score_c \geq 85$

Steps:

1. From Setup, in the Quick Find box, search for **Flows**.
2. Click **New Flow**.
3. Select Category: **Triggered**.
4. Select Type: **Record-Triggered Flow**.

5. Select Object: **Candidate_Application__c**.
6. Configure Trigger:
When a record is **created or updated**.
7. Set Entry Conditions:
8. Field: **AI_Candidate_Score__c**
Operator: Greater than or Equal
Value: 85
9. Select:
10. Run Every time a record is created and meets the condition requirements.
11. Optimize the flow for **Actions and Related Records**.
12. Click on the + icon and add **Send Email Alert** action.
13. Select Email Alert:
High Priority Candidate Application Email Alert
14. Enter the Label as:
High Priority Candidate Application Notification
15. Map RecordId to the **Record Id** field.
16. Save the Flow and **Activate**.

Activity 2: Record-Triggered Flow – High Salary Offer Submission for Approval

Objective:

Automatically submit a candidate offer for approval when a high salary amount is applied.

Trigger Condition:

- Offer_Amount__c > 1000000

Steps:

1. From Setup, in the Quick Find box, search for **Flows**.
2. Click **New Flow**.
3. Select Category: **Triggered**.
4. Select Type: **Record-Triggered Flow**.
5. Select Object: **Candidate_Application__c**.
6. Configure Trigger:
When a record is **created or updated**.
7. Set Entry Conditions:
8. Field: Offer_Amount__c
Operator: Greater than
Value: 1000000
9. Select:
10. Run Every time a record is created and meets the condition requirements.
11. Optimize the flow for **Actions and Related Records**.
12. Click on the + icon and add **Submit for Approval** action.
13. Select Approval Process:

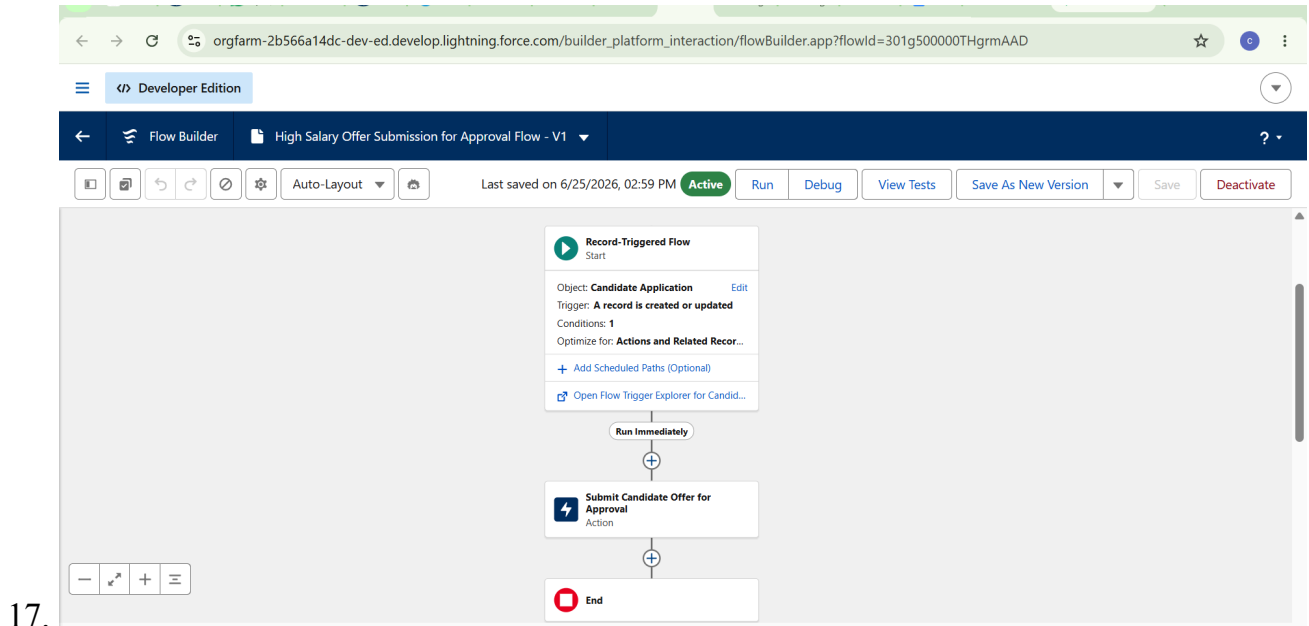

High Salary Candidate Offer Approval

14. Enter the Label as:

Submit Candidate Offer for Approval

15. Map RecordId to the **Record Id** field.

16. Save the Flow and **Activate**.

Activity 3: Scheduled-Triggered Flow – Pending Candidate Application

Follow-Up

Objective:

Automatically identify candidate applications that are pending approval for more than 3 days and notify the Recruiter.

Schedule Condition:

- Runs daily

Steps:

1. From Setup, in the Quick Find box, search for **Flows**.

2. Click **New Flow**.
3. Select Category: **Triggered**.
4. Select Type: **Scheduled-Triggered Flow**.
5. Set the Start Date and Time
(for example: Today, 9:00 AM).
6. Set Frequency: **Daily**
7. Select Object: **Candidate_Application__c**
8. Set Condition Requirements:
9. Approval_Status__c Equals Pending
10. Set Additional Condition:
11. LastModifiedDate Less than TODAY() – 3
12. Optimize the flow for **Actions and Related Records**.
13. Click on the + icon and add **Send Email Alert** action.
14. Select Email Alert:
Candidate Application Approval Status Email Alert
15. Enter the Label as:
Pending Application Reminder
16. Map RecordId to the **Record Id** field.
17. Save the Flow and **Activate**.

Activity 4: Screen Flow – Candidate Application Creation Wizard

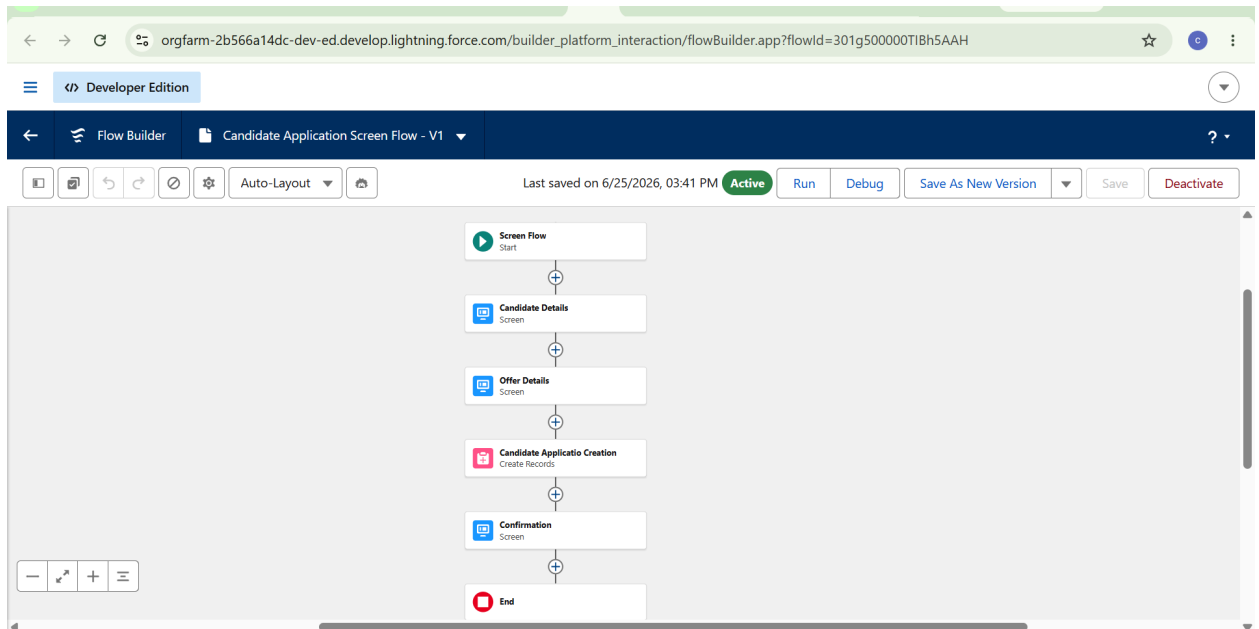

Objective:

Provide a guided, user-friendly screen-based process for recruiters to create candidate applications.

Steps:

1. From Setup, in the Quick Find box, search for **Flows**.

2. Click **New Flow**.
3. Select Category: **Screen Flow**.
4. Click **Create**.
5. Add a Screen element:
6. Screen Name: Candidate Details
7. Fields:
8. Candidate
 - Job Opening
 - Application Date
9. Add another Screen element:
10. Screen Name: Offer Details
11. Fields:
12. Offer Details
13. Offer Amount
14. AI Candidate Score
15. Add a Formula / Assignment:
16. Calculate Final Offer Amount
17. Add a Create Records element:
18. Create **Candidate_Application__c** record
19. Add a Confirmation Screen:
20. Display:
21. Candidate Application Created Successfully
22. Save the Flow with name:
23. **Candidate Application Screen Flow**
24. Activate the Flow.

Milestone 14: Agentforce AI

Activity 1: Create Recruitment Assistant Agent

Objective

Create an AI-powered Recruitment Assistant using Agentforce Studio.

Steps

1. Go to Setup.
2. Search for Agentforce Studio.
3. Click Agentforce Studio.
4. Open the Agents tab.
5. Click New Agent.
6. Under Start with a template, select Agentforce Employee Agent.
7. Enter the following details:
8. Agent Name :Recruitment Assistant Agent

9. Click Create.

Save and Activate

Activity 2: Create Prompt Template – Candidate Application Summary

Objective:

Generate an AI-based summary of a candidate application for recruiters and hiring managers.

Steps:

- From Setup, search for **Prompt Builder**.
- Click **Prompt Builder**.
- Click **New Prompt Template**.
- Select Prompt Type: **Summary**
- Select Object: **Candidate_Application__c**
- Enter Prompt Name:
Candidate Application Summary Prompt

Prompt Content:

You are an AI Recruitment Assistant.

Summarize the candidate application using the available Salesforce record.

Include:

- Candidate Name
- Job Opening
- Experience Level

- AI Candidate Score
- Offer Amount
- Application Status

Provide:

- Candidate Summary
- Candidate Strengths
- Possible Risks
- Hiring Recommendation

Only use the information available in Salesforce.

Do not generate information that is not present.

Click **Save and Activate**.

Activity 3: Create Prompt Template – Hiring Risk Analysis

Objective:

Help hiring managers understand whether a candidate application is risky or high value.

Steps:

- Go to **Prompt Builder**.
- Click **New Prompt Template**.

- Select Prompt Type: **Flex**
- Select Object: **Candidate_Application__c**
- Prompt Name:
Candidate Hiring Risk Analysis Prompt

Prompt Content:

- Analyze the candidate application.
-
- Provide:
-
- Candidate strengths
- Candidate weaknesses
- Hiring recommendation
- Risk Level (Low, Medium, High)
-
- Base your recommendation only on the Salesforce record.
-
- Click **Save and Activate**.

place with

Activity 4: Customize Recruitment Assistant Agent

Objective

Customize the default Employee Agent for recruitment.

Steps

1. Open **Recruitment Assistant Agent**.
2. Click **General FAQ**.
3. Replace the default reasoning instructions with:

You are a Recruitment Assistant for the AI-Powered Job Recruitment & Candidate Management System.

Answer recruitment-related questions.

Help recruiters understand:

- Candidate Applications
- Job Openings
- AI Candidate Score
- Application Status
- Offer Amount

Provide hiring recommendations only from available Salesforce information.

If information is missing, ask the user for clarification.

Never create or assume information that does not exist in Salesforce.

4. Click **Save**.

Activity 5: Test Recruitment Assistant Agent

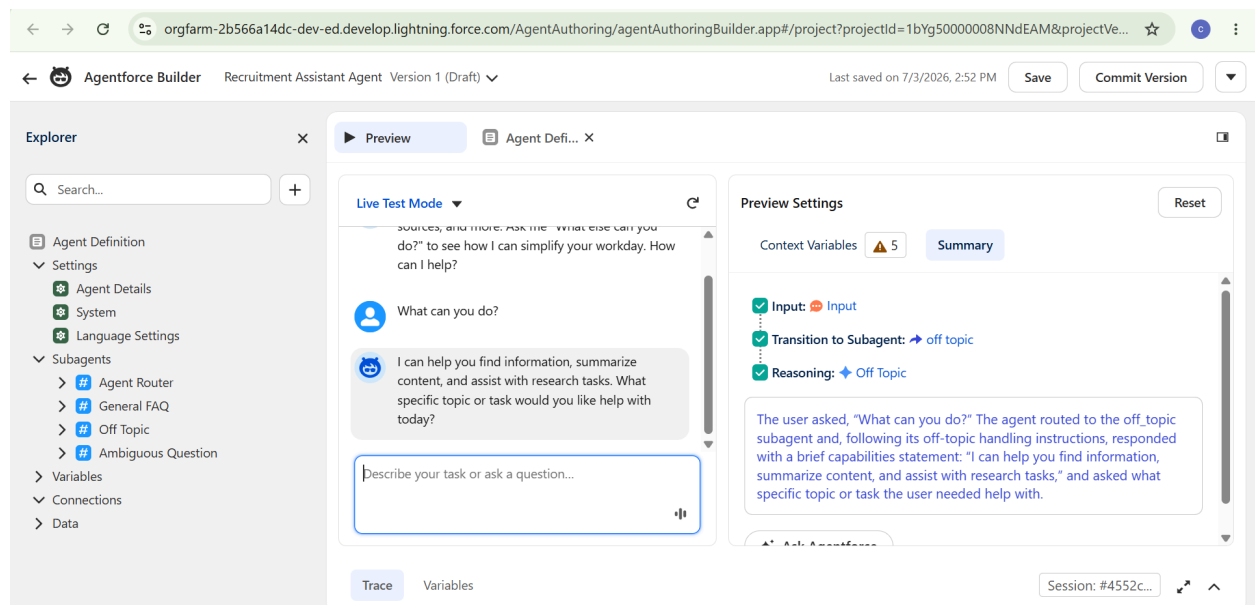

Objective

Verify that the Recruitment Assistant Agent responds to recruitment-related questions.

Steps

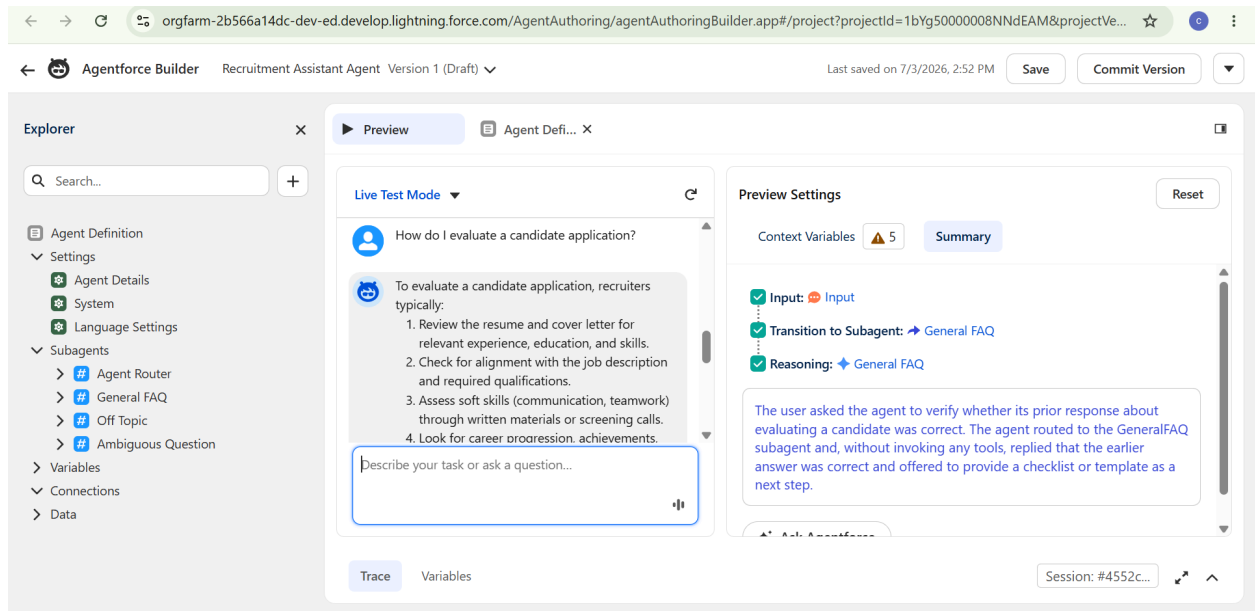

1. Open the Recruitment Assistant Agent.
2. Click Preview.
3. Ask:

What can you do?

How can you help recruiters?

How do I evaluate a candidate application?

4. Verify that the agent responds correctly.

Expected Result

The Recruitment Assistant Agent provides recruitment guidance and asks follow-up questions when additional information is required.

Note:

The default Agentforce Employee Agent provides general AI assistance based on its configured instructions and available knowledge.

In a standard Salesforce Developer Edition, the agent may not automatically retrieve data from custom objects such as Candidate Application or Job Opening without additional Agentforce configuration or Data Cloud capabilities.

If the agent asks for more information instead of summarizing a record, this is expected behavior unless additional grounding or custom actions have been configured.

Milestone : The Lightning App

Activity 1: Create a Lightning App for “AI-Powered Recruitment & Candidate Management System”

“From Setup, enter App Manager in the Quick Find and select App Manager.

1. Click New Lightning App.
